selection coefficient s
dominance h
adult F_{IS} from selection alone
adult F_{IS}
zygotic inbreeding coefficient F ($p = 0.5$)
overdominant ($s = -0.3$, $h = 1.5$)
underdominant ($s = 0.3$, $h = 1.5$)
additive ($s = 0.3$, $h = 0.5$)
neutral ($s = 0$)
